DETAILED ACTION

Claims 14-32 are pending in this application and were examined on their merits.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The objection to the Specification for minor informalities has been withdrawn due to the Applicant's amendment to the Specification filed 07/05/07.

The rejection of Claims 14-32 under 35 U.S.C. § 112, 2nd paragraph for failing to particularly point out and distinctly claim the subject matter which the Applicant regards as the invention has been withdrawn due to the Applicant's amendments to the claims filed 07/05/07.

The rejection of Claims 14-32 under 35 U.S.C. § 103(a) as being unpatentable over Keyes (US 4,169,765) in view of Yamagishi *et al.* (US 6,730,212 B1) has been withdrawn due to the Applicant's amendments to the claims filed 07/05/07.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 14-32 are newly rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Newly amended claim 14 is drawn to a method of determining an organism, the method comprising assaying a plurality of enzymes with a plurality of sensors to determine a suite of enzymes expressed by the organism. Support for this limitation is not found in the originally filed claims or specification. The Applicant points to the Specification at pg. 5, lines 22-26 as supporting this new limitation, however those lines are only drawn to general teachings of sensors and not the specific detection of a suite of enzymes expressed by organisms by a plurality of sensors. Similarly, Specification, page 6, line 20 to page 7, line 4 do not support this limitation in any manner.

Throughout the disclosure and examples, it is noted that the sensor and enzyme (organism-derived and encapsulated) are referred to in the *singular*, see for example, Pg. 10, Lines 6-9, Pg. 12, Lines 14-19, Pg. 13, lines 14-16 and page 14, Lines 1-15 and Pg. 14, Lines 21-28, Pg. 15, Lines 1-28 and Pg. 16, Lines 1-17. **THIS IS A NEW MATTER REJECTION.**

Applicant is notified that the rejection of Claims 14-32 under 35 U.S.C. § 103(a) has been withdrawn due to the addition of this new limitation, however upon removal of the new matter as described above the rejections will be reinstated.

Conclusion

No Claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
